

Vision

To be the number one market supplier of high value marine transportation and subsea services in Western Canada to customers who demand quality, service and operational excellence.

Values

- Respect and protect people, the environment and property
- Conduct ourselves with honesty and integrity
- Operate to the highest standards in the industry
- Build and foster strong stakeholder relationships

Missions

Our Employees – Our employees are the foundation of our organization. We will build on this foundation by retaining the best people, empowering our employees, putting our employees and their families first, and by providing leadership that maintains and enhances a safe, positive and equitable work environment. We will create a culture that inspires people to be fully engaged. This culture will allow all our employees to be at their best and will support both their personal and professional development.

Safety Culture – Each employee has a responsibility to work safely and to promote safe work practices that support a “zero” incident culture. Everyone will be accountable for their own safety and the safety of others. When it comes to safety there will be no hierarchy. We will not walk past an unsafe act. All incidents will be reported quickly and through our strong commitment to incident prevention and best practices, we will strive to attain the goal of zero injuries.

Environment – ITB’s commitment to the protection of the environment will extend beyond regulatory compliance. By actively engaging and consulting with all stakeholders, ITB will identify and implement current pollution prevention best practices and will ensure industry leading asset quality and maintenance programs. Through our strong commitment to these best practices, we strive to attain the goal of zero spills and minimizing environmental impacts in all our operations.

Regulations – ITB will meet or exceed the requirements of all applicable domestic and international regulations as well as industry and 3rd party guidelines. Legislation and outside guidelines will be considered the minimum requirement and ITB will lead by implementing best practices that elevate these standards where applicable.

Customers and Key Stakeholders – We are committed to understanding and satisfying our customer and stakeholders’ internal and external needs. We will achieve this through customer engagement, strong relations, continuous improvement, integration and alignment of processes, analysis of data and instituting best practices wherever possible.
